### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 5 and 7 are allowed over the references of record.

Claim 5 (in the form of dependent claim 6, as the claims were written on 11/09/05) was recently compared to Lowther et al. 2003/0127686. It was found that Lowther et al.'s continuous spiral interconnect 120-122 is 100% conductive. Therefore the internal and external ends of Lowther et al.'s continuous spiral interconnect 120-122 are electrically connected to everything that is electrically connected to any part of Lowther et al.'s continuous spiral interconnect 120-122. It is thus impossible for Lowther et al.'s second underpass interconnect (marked 132 but on the opposite side of continuous spiral interconnect 120-122 from first underpass 132) to be simultaneously electrically connected to Lowther et al.'s continuous spiral interconnect 120-122 at a point between the internal end and the external end, but not electrically connected to Lowther et al.'s continuous spiral interconnect 120-122 at the internal and external ends thereof. Note claim 6 at lines 4 and 5, where an electrical connection to one point of the claimed continuous spiral interconnect is required but electrical connections at the ends are prohibited. The continuous spiral interconnect of claim 6 clearly must have two electrical breaks preventing electrical connection between the part thereof that must electrically

connect to second underpass interconnect, and the internal and external ends of the claimed continuous spiral interconnect, which may not.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
